Education

National Institute of Technology, Jalandhar

Bachelor of Technology in Computer Science and Engineering

July 2019 – May 2023

Jalandhar, Punjab

Punjab School Education Board

Higher Secondary Education (PCM)

March 2018

Fazilka, Punjab

Experience

Quest Global

Software Engineer

September 2024 – February 2026

Bengaluru, Karnataka

- Contributed to the **Philips IGT (Image Guided Therapy)** platform by developing high-performance medical imaging software, improving workflow efficiency by **15%** through optimized C/C++ components.
- Built UI components integrated with backend C/C++ modules, enhancing user interaction and reducing operator task time by **20%**.
- Developed backend functionalities in C/C++ to support real-time imaging features and patient data workflows.
- Increased reliability of real-time imaging features by writing extensive unit tests using Google Test, improving test coverage by **40%**.
- Debugged and optimized performance-critical modules, reducing latency in image processing workflows by **20%**.
- Collaborated with cross-functional teams to ensure healthcare software compliance, resulting in **25%** fewer integration defects.
- Tech Stack: C/C++, MFC, Linux, Git, Google Test, Debugging.

Veltris

Software Engineer

June 2023 – August 2024

Hyderabad, Telangana

- Worked on **SD-WAN**-based Aruba EdgeConnect (HPE) platform, contributing to Network Access Control (NAC) features and improving system stability by **20%**.
- Developed and debugged Command Line Interface (CLI) features, improving command execution reliability by **25%**.
- Implemented reverse mapping for NAC CLI commands, improving traceability and reducing debugging time by **40%**.
- Developed secure APIs for interface and role deletion, reducing data inconsistencies and unauthorized access scenarios by **30%**.
- Tech Stack: C/C++, Linux, SD-WAN, TCP/IP, CLI Development, Git, Bitbucket, JIRA, GDB.

Projects

Decentralized Voting System | *Flutter, Dart, Solidity, Ethereum*

Jan 2022

- Built a secure decentralized voting DApp with smart contracts for election, voter, and candidate management.
- Implemented voter verification and one-vote enforcement using blockchain.

Billing Payment System | *C++*

Oct 2020

- Developed a billing system with item browsing, cart management, and dynamic total calculation using OOP principles.

Bank Accounting Application | *C++*

Mar 2021

- Designed an admin-driven banking application supporting account creation, transactions, and balance management.

Technical Skills

Languages: C, C++, JavaScript, SQL, HTML, CSS

Developer Tools: Visual Studio, Git, GitHub, Bitbucket, GDB, Google Test (GTest), MobaXterm, MySQL

Technologies / Frameworks: Linux, SD-WAN, Network Access Control (NAC), MFC, JIRA, Agile Development, CLI, Debugging

Volunteer Experience

PRAYAAS Society

Volunteer

Oct 2019 – May 2023

NIT Jalandhar

- Provided free academic mentoring to underprivileged students through regular teaching sessions.
